I admire. In Places I Stopped on the Way Home, Meg Fee plots a decade of her life. Talk to other women who have faced the same decision. When planning the temple, I remembered the existence of people who hate those they call crybabies, and how they might respond with rage to a place full of distraught strangers—a place that exposed suffering as what is shared. I enjoyed reading about the love and support of the author's husband during her cancer journey especially since I too have been fortunate in having such a wonderfully supportive and loving husband who was there for my surgeries, treatments and other cancer scares though, knock wood, have so far been false alarms. A version of this post originally appeared on Grandparents. It tells my daughter some serious issues would have to be addressed, and things would be different.
