Landscape Wind Breaks. Sadly, many new plant varieties are not enthusiastically perfumed, but here are some pleasing options: Note: These are examples; always investigate first to determine whether a type of plant is native to your region. At the same time, butterflies are equally picky about what plants they will select to lay their eggs on.

You can look up your zone and choose plants that are native or do well in your region. Whenever possible, use organic pest control solutions instead of harsh chemicals. Because of the higher mortality rate, the report recommends not growing *Sullivantii* or *Hirtella*. Hi David, no conclusive answer to this question...it could just be a natural variation.

Again love this site and I pass it along often on Facebook. It also attracts so many butterflies. Take a more scientific approach by raising or rearing butterflies from ova to imago.
