Furthermore, although scientists have experimented to determine its effects on a number of organisms—from spiders and rats to humans—they have not been able to come to many conclusions about its harmfulness. For example, at the start of the chapter about Europe's first use of caffeine, there is this quote from Jose de Acosta, S.

The chapter heads are handwritten in a tight jittery style, I guess to look like someone who just drank a few cups of coffee. It's divided into two sections: 1 Caffeine in the Laboratory which included 2 particularly interesting sub-sections about the metabolism of caffeine which happens in every cell in every part and fluid of the body, including semen, and how it differs depending on an individual's composition, weight, sex, eating habits, whether or not they smoke or drink, what stage of pregnancy they may be in. We provide complimentary e-inspection copies of primary textbooks to instructors considering our books for course adoption.
